

React Apps!

We Build Custom Software

No Jargon - No Complexities!

Example APPS

React Apps is a custom/bespoke software app company with over twenty years' experience in custom software app delivery from concept to delivery. Our blend of business expertise and technical know-how has enabled us to help clients achieve their business goals. We focus on really understanding our customers' needs and issues and build apps to improve their business performance and profitability. We can maximise the value of your investment, improve workflows, and allow your staff to get more done in less time.

Low code * Low Fuss * Rapid Development = Software that works within everyones budget.

Mobile Apps for your Business

Easily run FileMaker on all your mobile devices. No matter where you are, you can always have access to your FileMaker solution. Capture signatures, manage your inventory, sync your data for offline access, process orders on the fly and much more.

Example APPS

Desktop (browser) Apps for your Business

Easily run your custom web app on your favourite PC or MAC using your favourite browser. No matter where you are, you can always have access to your solution.

Example APPS

Integration

Optimize your business workflow by integrating 3rd party applications with your FileMaker solution. Download your orders from Shopify, push invoices into QuickBooks, pull data from WordPress forms, send SMS text messages and much more.

Example APPS

The "Geeky" Bits

If you are still reading and If you are not into technical stuff then look away now.. we use the FileMaker platform (apple company) to build the databases, browser interface and mobile apps. We use Javascript within filemaker to extend it. For standard web forms we use HTML, CSS, JS and PHP on the server side, all connecting to FileMakr data via a REST API.

We're Ready To Help You.
